case study

TAQA had some issues with their current meeting facilities cable management and asked us to provide a solution. After discussions with management and their IT department, all tables were supplied and fitted with a flip up hatch and a cable channel below fitted with power, data, VGA and sound connections, all cabled through the beam and leg frame to the floor.

Style were also asked to assist in the implementation of an Emergency Response Suite within the building. After many discussions, Style along with the Architect came up with a suitable solution which met the requirements of TAQA, Prosource IT and the offshore industry. Pictures of this area is unavailable for security reasons.

TAQA take the well-being of their staff to the highest level.

In these hi-spec business spaces, they have installed staff breakout areas in various locations within each building and a Costa Coffee facility with hot meals in two of the buildings.
